

New Model Information

The power handle for big games

Fitting image of TORS A20

① Equipped with our original EVA AE handle knob!!

We have combined our hollow core air egg knob with a highly sensitive aluminum cap to make these knobs the lightest and most ergonomic ones on the market.

② This handle is 105mm in length and made from highly durable duralumin!

This crank style handle was forged from highly durable duralumin!! We have also mechanically engraved our SOM logo on the handle to give you some attitude! With this handle, you will realize unparalleled jigging performance with any weight jig!

③ We are using thick shafted TB340H titanium rivets to join the handle knob arm and handle arm!!

Using these thick titanium rivets makes the joining of the handle knob arm and handle arm, the strongest on the market!!

④ Others

Fitted with two anti-rust bearings! We are using our own original "ARM BASE METHOD TECHNOLOGY". Even when your preferred manufacturer updates their reels, this "ARM BASE METHOD TECHNOLOGY" will allow you to switch this handle directly to that new reel! This means you will be able to use this handle for many years to come!! Exciting technology!

(Arm length : SOM=105mm, TORS A20=85mm, OCEAJIGGER4000P=105mm, MARFIX=100mm)

(Handle weight : SOM=93g, TORS A20=84g, OCEAJIGGER4000P=82g, MARFIX=121g)
