

New Model Information

SOM PREMIUM HOOK Ocean TWIN

**Introducing our all new "Ocean Twin" premium hooks!
SOM and Miyako Island Top GT captain Mr. Goto(Fishing Guide Service Morizo)
have spent two years collaborating with each other and have finally came up
with the perfect hook setting!**

**These hooks are not simply stuck together and sold!
We have designed our Ocean Twin hooks to remain tangle free and also
give superior swimming balance to your topwater plugs.**

■HOOKING

After two years of testing, We are proud to say that hook-up ratios while using our Ocean Twin hooks over standard treble hooks against charging GT's have helped substantially! Thanks to a smaller silhouette and precise balance between the solid ring and hooks(Gz set), these hooks will always remain facing in the proper direction! Ocean Twin hooks will allow for unparalleled swimming performance and ultimate hook strength and penetration!

■ACTION

Our Ocean Twin hooks will also allow you to change your topwater plugs action! You can make your favorite plug a floating pencil, diver or sub-surface swimmer by simply using a larger/smaller hook size! We also recommend adding a eggplant weight for choppy days out at sea!

■CASTING

Casting performance is also enhanced do to the hooks form while in flight! Ocean Twin hooks will stay closer to your plugs body while casting, allowing for less wind interference!

SOM PREMIUM HOOK Ocean TWIN
